

Rubrics for Evaluation of FYP Demonstration

Criteria	1	2	3	4	5
R1 Completeness and Accuracy	The system failed to produce the right accurate results	The system execution led to inaccurate or incomplete results. It was not correctly functional or not all the features were implemented.	The system was correctly functional and most of the features were implemented	The system was correctly functional and all of the features were implemented	The system was correctly functional and all of the features were implemented. It was demonstrated how the real world problem was solved
R2 Coding Standards	Coding standards, best programming practices are not followed. Students cannot understand the code.	Coding standards, best programming practices are not followed.	Coding standards, best programming practices are rarely followed.	Coding standards, best programming practices are followed appropriately	Coding standards, best programming practices are followed extensively
R3 Ways of Demonstration	The system does not fulfill the functional requirements.	It is not clearly demonstrated how the system fulfills its functional requirements	It is demonstrated how the system fulfills some of its functional requirements	It is demonstrated how the system fulfills most of its functional requirements	It is clearly and effectively demonstrated how the system fulfills all of its functional requirements
R4 Quality	Student is unaware of System's non-functional requirements	System's non-functional requirements (as mentioned in SRS) are not demonstrated	Some of the system's non-functional requirements are demonstrated	Most of the system's non-functional requirements are demonstrated	All of the system's non-functional requirements are clearly demonstrated
R5 Originality	Most part of the working product is copied.	Working product is uninspired and straightforward work with little to no creative potential.	Working product has some potential for making a creative contribution.	Working product has some creative /original /inventive element and a potential for making a creative contribution	Working product has several creative /original /inventive /innovative elements and a clear potential for making a creative contribution.
R6 Modern Tool Usage	Modern engineering software were not used, where applicable, to solve complex engineering problems.		Computer-based tools and technical software were used, but more could have been used to solve the problem.		Modern computer-based tools and software were used extensively in the project. New software/language was learned as needed

FYP Demonstration Evaluation Form

Project Title _____

Student Names _____

PLO	S No	Description	Weight	Performance (1 – 5)					Marks
PLO-11: Project Management	R1	Completeness and Accuracy	1	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	
PLO-3: Design/ Development of Solution	R2	Coding Standards	1	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	
PLO-10: Communication	R3	Ways of Demonstration	1	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	
PLO-3: Design/ Development of Solution	R4	Quality	1	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	
PLO-8: Ethics	R5	Originality	1	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	
PLO-5: Modern Tool Usage	R6	Modern Tool Usage	1	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	

Evaluator Name: _____ Signature (Date) : _____
