

Rubrics for Evaluation of FYP Report

Criteria	1	2	3	4	5
R1 Abstract	Abstract is not written or written in a vague form	Abstract is written in an ordinary way. The important results are not clear to a reader who is unfamiliar.	Abstract provides a reasonable description of the project but can be improved	The abstract provides a good overview of the project and results in two pages or less.	Abstract is excellently written according to the scientific writing standards and provides a good summary in two pages or less
R2 Literature Review, References	Literature Review is not written or written in a vague form. The list of references is clearly inadequate.	Literature Review is written in an ordinary way. The review material i.e. research papers or web material is not at all clear to a reader who is unfamiliar. The list of references should be expanded	Literature review provides a reasonable description of the project background and its significance but can be improved. Number of research papers/ web material needs to be added more. The list of references appears reasonable but citation does not follow standard format.	The review provides a good background and details of the literature. However, it is not written in scientific writing standards for review. The list of references appears reasonable and citation follow standard format	Literature review is excellently written according to the scientific writing standards and covers maximum of the research papers/web material related to project. A comprehensive list of references is cited using a standard format
R3 Problem Statement	Problem statement is not stated at all or vaguely stated	Problem statement is stated but not entirely clear.	Problem statement is stated but lacks necessary justification in light of the literature review.	Problem statement is stated and covers necessary justification with reference to the literature review.	Problem statement is stated and covers sufficient justification. New reader can clearly understand its value and context
R4 Methodology	The approach taken to solve the problem is not discussed.	Some aspects of the solution are discussed briefly but much of the description is left out.	The methods, approaches, tools, techniques, algorithms, or other aspects of the solution are discussed but not in a convincing manner. Much is left to the readers' imagination.	The methods, approaches, tools, techniques, algorithms, or other aspects of the solution are sufficiently discussed.	The methods, approaches, tools, techniques, algorithms, or other aspects of the solution are sufficiently discussed with sufficient details and supporting figures.
R5 System Architecture	System architecture is not included at all or vaguely stated	System architecture is included but entirely poor way. No architecture design approach is stated. Subsystem architecture is not	System architecture is included in ordinary way. Architecture design approach is stated. However, it is missing the required details. Subsystem architecture is also not clear and missing few	System architecture is included in good way. Architecture design approach is stated and clear. Subsystem architecture is also clear. Functional description or object oriented description is	System architecture is included in excellent way. Architecture design approach is stated and clear. Subsystem architecture is also added in excellent way. Functional description or object oriented description is included

		mentioned. Neither functional description nor object oriented description is included	important information. Functional description or object oriented description is included; however, required diagrams are missing	included along with required diagrams. However, there is still need to add more details and further improvements are required	along with required diagrams. There is no need for further improvements
R6 Detailed system design	System design is not included at all or vaguely stated	System design is included but entirely in poor way. No low-level components and subcomponents are stated. Also class diagram and ER diagrams are missing	System design is included in ordinary way. Low-level components and subcomponents are described but, it is missing the required details. Also class diagram and ER diagram are ordinary designed	System design is included in good way. Low-level components and subcomponents are described with adequate details. Also class diagram and ER diagram are good. Subcomponents are described according to software component attributes i.e. classification, definition and responsibilities etc. However, does not cover all the ten attributes	System design is included in excellent way. Low-level components and subcomponents are described with very good details. Also class diagram and ER diagram are drawn according to UML standards. Subcomponents are described according to software component attributes i.e. classification, definition and responsibilities etc. And it cover all the ten attributes
R7 Implementation and Testing	System implementation and testing is not included at all or vaguely stated	System implementation is included but entirely in poor way. Very little description is added. No system testing is performed	System implementation is included in ordinary way. However, Testing is not adequate enough to test the entire system	System implementation is added in good way and provides all the necessary details for the reader. System testing is performed in good way. Various test cases are generated and details are included; however, further improvements are required regarding the number and quality of test cases	System implementation is added in excellent way and provides all the necessary details for the reader. System testing is performed in very good way. Various test cases are generated and details are included. No further improvements are required regarding the number and quality of test cases
R8 Results	Results and evaluation of the solution are not provided.	Results and Evaluation of the solution are briefly discussed without supporting figures and graphics.	Results and Evaluation of the solution are discussed with few supporting figures and graphics	Results and Evaluation of the solution are discussed with supporting figures and graphics.	A comprehensive evaluation of the solution is presented with supporting figures and graphics.

		Evaluation test cases do not cover all the use cases.	Evaluation performed using weak testing strategy.	Evaluation test cases cover all the use cases. Deployment plan is presented	System testing is performed through a strong testing strategy and the test cases cover all the use cases. Their results are added properly
R9 Conclusion and future work	Conclusion does not present the essential project contribution and results. No recommendations for follow-up work given.	Essential project results are not clearly stated. Recommendation for future work is incomplete.	Conclusions are largely qualitative rather than quantitative. The discussion of strengths and limitation could be expanded. Recommendations for future work are given but not clearly thought-out.	Most important results and contribution are presented. Strengths and limitations of the final design are discussed. Some cost information is included. A good set of recommendations for future work is provided. Reflections on the design process are included.	Conclusions provide a succinct summary of all essential results. Results are summarized quantitatively as well as qualitatively. The discussion of strengths and limitations is insightful and objective. Useful final cost information is provided. A clear and complete set of recommendations for follow-up work is provided. A succinct evaluation of the design process is provided.
R10 Language and Grammar, Formatting Style	A lot of spelling and grammatical mistakes Writing is not understandable. Improper format and style. Table of content missing.	Frequent spellings and grammatical errors that impede the reading flow. Writing is in need of significant editing and improvement. The formatting of the chapters may need improvement.	Occasional spellings and grammatical errors Writing is acceptable but not entirely clear. Formatting style is proper but figures and tables don't follow standard practice (caption figure number etc.)	Occasional spellings and grammatical errors that have only minor impact on flow of reading. Writing is overall clear. Organization is good. Content is supported by good number of figures and tables. Formatting style of chapters, table of contents, title page, references and appendices are proper.	Almost no spelling or grammatical mistake. Writing is easy to read. Excellent organization. Writing is concise yet all necessary content is included. Content is supported by good number of figures and tables. Formatting style of chapters, table of contents, title page, references and appendices are proper and relevant.

R11 Submission and Similarity	Poor work ethic – late submission, major content copied from resources. (Turn-it- in report >30%)	Fair work ethic – submit on time but significant portion of the content copied from resources. (Turn-it- in report >30%)	Fair work ethic – submit on time, minor copying (Turn-it- in report < 30%)	Good work ethic – submit on time, minor copying (Turn-it- in report < 30%)	Excellent work ethic – submit earlier than dateline, novelty of work is evident. (Turn-it- in report <20%)
